

Rakib Mahmud Nadir

Offensive Security Professional | Penetration Tester | AI/LLM Security Researcher

C RTP | C RTO (In Progress) | eJPTv2 | C R T A

Khulna, Bangladesh | +880 1785029110 | sec.rakibnadir@gmail.com | [linkedin.com/in/rakib-nadir](https://www.linkedin.com/in/rakib-nadir) | [rakib-nadir.github.io](https://github.com/rakib-nadir) | medium.com/@rakib_nadir

SUMMARY

Offensive security professional with hands-on experience in web and network penetration testing, Active Directory attack simulation, and adversarial AI/LLM security. Currently conducting VAPT engagements at Cyenetic Solutions Ltd, identifying critical vulnerabilities and delivering risk-based remediation. CRTP-certified, World Bank VDP contributor, and ranked top 1% on TryHackMe..

SKILLS

Penetration Testing

- Web Application Penetration Testing
- OWASP Top 10 including SQLi, XSS, IDOR, auth bypass, CSRF, SSRF, command injection, file inclusion, and business logic flaws

Network Penetration Testing

- Service enumeration, credential attacks, misconfiguration exploitation

Active Directory Security

- Enumeration, lateral movement, privilege escalation, multi-forest labs

AI / LLM Security

- Research into adversarial techniques against large language models — prompt injection, guardrail bypass

Security Operations

- Endpoint security, network security monitoring, SOC workflows, vulnerability scanning & validation
- Reporting — risk-rated findings, executive summaries, technical remediation recommendations

EXPERIENCE

Junior VAPT Engineer

April 2026 – Present

Cyenetic Solutions Ltd. — Dhaka, Bangladesh

- Performed web and network penetration tests identifying high and critical vulnerabilities across real-world environments
- Discovered and validated vulnerabilities including XSS, IDOR, authentication flaws, and misconfigurations
- Delivered risk-rated reports with actionable remediation, improving client security posture
- Created proof-of-concept validations and automation scripts to streamline testing and vulnerability verification workflows
- Collaborated with development and infrastructure teams to communicate findings and support secure remediation

Assistant Mentor

December 2025 – March 2026

Hack Secure — Remote

- Mentored interns through offensive security labs covering web app pentests (OWASP Top 10, SQLi, XSS, IDOR) and network penetration testing
- Designed training content on hash cracking, post-exploitation, and vulnerability scanning; reviewed and gave feedback on intern remediation reports.
- Guided interns in hands-on pentesting labs and workflow improvement

Cyber Security Intern

April 2025 – May 2025

Hack Secure — Remote

- Conducted web app and network penetration tests covering OWASP Top 10, SQLi, XSS, IDOR, service enumeration, and misconfiguration exploitation
- Performed hash cracking, post-exploitation workflows, and vulnerability scanning; co-hosted cybersecurity webinars. contributed to improving ethical hacking workflows

CERTIFICATIONS

- Certified Red Team Professional (CRTP) — Altered Security
- Certified Red Team Operator (CRO) — Zero-Point Security (In Progress)
- Junior Penetration Tester (eJPTv2) — eLearnSecurity
- Certified Red Team Analyst (CRTA) — Cyber warfare Labs
- Certified Network Security Practitioner (CNSP) — The SecOps Group
- Certified SOC & Endpoint Detection Professional (CSEDP) — The SecOps Group
- Practical Help Desk — TCM Security
- Networking Certification Essentials — IT Masters (Charles Sturt University)

HONORS & AWARDS

Acknowledged Security Contributor — World Bank Group

Issued by World Bank Group · Apr 2026

Identified and responsibly disclosed a broken link hijacking vulnerability through the World Bank Group's Vulnerability Disclosure Program (VDP-2026-1027). The vulnerability was acknowledged and resolved by the security team.

1st Place — CTF War Homelab

Issued by Hack Secure

Achieved 1st place in the CTF War Homelab competition organized by Hack Secure, demonstrating advanced offensive security skills across a series of capture-the-flag challenges.

PROJECTS

Adversarial LLM Security Assessment

- Built and pentested a local multi-model AI environment (Ollama) with Mistral, Qwen, Gemma, Granite, LLaMA; used Garak v0.14 (768 attempts) — Mistral:7b rated DC-2 with up to 70.70% prompt injection success rate
- Fingerprinted a live RAG chatbot's hidden model (Mistral-7B-Instruct-v0.3) via LLMmap response-pattern analysis with no internal access; mapped findings to OWASP Top 10 for LLM Applications
- Made Open-sourced garak-report-to-excel: a Python utility converting Garak .jsonl reports to structured Excel spreadsheets

Multi-Forest Active Directory Lab & Credential Harvesting

- Designed a 4-segment enterprise AD lab (primary forest, child domain, secondary forest) requiring full lateral traversal: external → DMZ → corporate → manufacturing
- Simulated cross-forest trust attacks, privilege escalation across domain boundaries, Mimikatz credential extraction, and Kerberos ticket replay (Overpass-the-Hash / Pass-the-Ticket)

Web Application Penetration Test (Grey Box)

- Identified critical vulnerabilities — weak JWT leading to account takeover, XSS session hijacking, authentication flaws, insecure transport — with OWASP/PTES-aligned remediation and a formal Penetration Testing report

Endpoint Persistence Analysis & Phishing Forensics

- Deployed and detected Meterpreter persistence (malicious service + registry run key); traced C2 via WMIC, TCPView, PSAutoRun; hash flagged 58/71 on VirusTotal
- Performed phishing email header inspection, SPF/DKIM/DMARC verification, and IOC documentation; confirmed credential harvesting portal via VirusTotal, URLVoid, and PhishTool

COMMUNITY & LEADERSHIP

- Offensive Security Wing Lead — KUET Cyber Security Club
- Speaker at cybersecurity webinars
- Top 1% TryHackMe ranked; active in Hack The Box and Hack Smarter Lab CTFs and simulations
- Medium-level technical writer publishing cybersecurity insights, lab walkthroughs, and vulnerability analysis articles

EDUCATION

B.Sc. Urban and Regional Planning

Khulna University of Engineering and Technology (KUET) — Khulna, Bangladesh

Jan 2023 – Dec 2027 (Expected)
