Dear Hiring Manager,

I am writing to express my interest in a cybersecurity role. As a Junior Penetration Tester and Assistant Mentor at Hack Secure, I have hands-on experience in web application and network security, Active Directory penetration testing, vulnerability assessment, and advanced LLM security research. I am proficient with tools such as Nmap, Burp Suite, Nessus, BloodHound, Mimikatz, and Python scripting, and I apply a structured approach to security testing: Recon → Enumeration → Exploitation → Lateral Movement → Domain Compromise.

During my tenure at Hack Secure, I have successfully conducted full engagement tests, identified critical vulnerabilities, and provided actionable remediation recommendations. I also participated in advanced CTF challenges, securing first place in the Hack Secure WAR HOMELAB competition, and built multi-forest Active Directory labs to simulate complex attack scenarios. These experiences strengthened my ability to think like an adversary while maintaining a strong focus on ethical and effective security practices.

In addition to my technical expertise, I have mentored junior team members and conducted knowledge-sharing sessions on penetration testing and security research. I am passionate about strengthening security postures, protecting digital assets, and staying ahead of emerging threats. I hold relevant certifications (CRTP, CRTA, eJPT, CNSP, and CRYPTO in progress) and continuously pursue learning through hands-on labs and research projects.

Thank you for your time and consideration. I look forward to the opportunity to discuss how my experience and skills can contribute to your organization's security objectives.

Sincerely,

**Rakib Mahmud Nadir**
